

1,4-Benzoquinone -

Hydroquinone -

Catechol -

Phenol -

Assay

Alters cell proliferation cell death or nutrient supply (37/68)

Induces chronic inflammation (23/45)

Induces epigenetic alterations (5/11)

Induces oxidative stress (10/18)

Is electrophilic or can be metabolically activated (21/31)

Modulates receptor mediated effects (35/92)
