USA, SEER (18 registries): White (2008–2012)
Average annual person-years by sex and age group

SOURCE OF POPULATION

Population estimates for the denominators of incidence and mortality rates are race-specific, ethnicity-specific, and sex-specific county population estimates aggregated to the state or metropolitan-area level. The county population estimates incorporated into the National Cancer Institute SEER*Stat software are a slight modification of the annual time series of 1 July county population estimates (by age, sex, race, and Hispanic origin).

NOTES ON THE DATA

*No official mortality data. †C67 (bladder cancer) includes neoplasms of uncertain or unknown behaviour together with invasive cancers.

USA, California, Los Angeles County: Black (2008–2012)
Average annual person-years by sex and age group
**SOURCE OF POPULATION**

Postcensal county estimates by age, sex, race, and ethnicity at the 1 July mid-year point. Based on the 2000 national census carried out by the United States Census Bureau, including the bridged single-race estimates derived from the original multiple-race categories.

NOTES ON THE DATA

*No official mortality data. †C67 (bladder cancer) includes neoplasms of uncertain or unknown behaviour together with invasive cancers.

USA, California, Los Angeles County: Chinese (2008–2012)
Average annual person-years by sex and age group
**SOURCE OF POPULATION**

Age-, sex-, and race-specific annual population estimates for 2000–2012 developed by the Los Angeles Cancer Surveillance Program for its catchment area: Los Angeles County (LAC). Estimates for 2000–2010 based on linear interpolations between the 2000 and 2010 census results for LAC. Estimates for 2011–2012 obtained by extrapolating the 2000–2010 population trends. Age- and sex-specific population counts for each racial group were represented by the simple average between the single-race (the minimum) and multiple-race (the maximum) counts of population for that racial group in each census year, respectively.

SOURCE OF POPULATION

Provided by the United States Census Bureau, based on decennial censuses and several other surveys, from which annual estimates of the population for each state are derived. Population estimates for the denominators of incidence and mortality rates are race-specific, ethnicity-specific, and sex-specific county population estimates aggregated to the state or metropolitan-area level.

Average annual person–years by sex and age group

SOURCE OF POPULATION

Provided by the United States Census Bureau, based on decennial censuses and several other surveys, from which annual estimates of the population for each state are derived. Population estimates for the denominators of incidence and mortality rates are race-specific, ethnicity-specific, and sex-specific county population estimates aggregated to the state or metropolitan-area level.

NOTES ON THE DATA

*No official mortality data. †C67 (bladder cancer) includes neoplasms of uncertain or unknown behaviour together with invasive cancers.

Average annual person-years by sex and age group

SOURCE OF POPULATION

Provided by the United States Census Bureau, based on decennial censuses and several other surveys, from which annual estimates of the population for each state are derived. Population estimates for the denominators of incidence and mortality rates are race-specific, ethnicity-specific, and sex-specific county population estimates aggregated to the state or metropolitan-area level.

NOTES ON THE DATA

*No official mortality data. †C67 (bladder cancer) includes neoplasms of uncertain or unknown behaviour together with invasive cancers.
